

NXG Hub Job Readiness Checklist

Use this guide to prepare for applications, interviews, and workplace opportunities.

1. Clarify your target role and write down the skills employers ask for most often.
2. Update your CV with measurable results, relevant tools, and recent projects.
3. Prepare a short introduction that explains who you are and what you can do.
4. Review the company, role, and industry before every interview.
5. Practice common interview questions with clear examples from your work.
6. Prepare thoughtful questions about the team, expectations, and growth path.
7. Check your internet, device, portfolio links, and documents before the meeting.
8. Send a follow-up message thanking the interviewer and restating your interest.

NXG Hub: How to Build a Tech Portfolio

A strong portfolio helps people understand your skill, judgment, and progress quickly.

1. Start with a clear headline that names your role, focus area, and strongest skills.
2. Add three to five focused projects instead of listing every task you have done.
3. For each project, explain the problem, your process, the tools used, and the result.
4. Include screenshots, live links, repositories, case studies, or short demos where possible.
5. Make your contact details easy to find and keep your social links professional.
6. Write in plain language. Recruiters and hiring managers should scan it quickly.
7. Keep improving the portfolio as you learn, ship, and receive feedback.
